

PROFESSIONAL PROFILE

Web developer with hands-on experience building responsive, accessible, and interactive websites using modern JavaScript (ES6+), React, and SCSS. Developed single-page applications like e-commerce and CRM prototypes with dark mode, animated scroll reveals, and real-time features. Proficient in component libraries like MUI and Bootstrap, and tools like Vite, Git, and ESLint. Integrated APIs and third-party packages to enhance user experience. Committed to clean, maintainable code and modern development workflows.

EDUCATION

MS Ramaiah Institute of Technology
Bachelor of Engineering in Electronics & Telecommunication
2020 – 2023

RNS Polytechnic
Diploma in Electronics & Communication
2017 – 2020

ACTIVITIES

Team Lead
at Pradarshana MSRIT

Volunteer
at IETE-Institute of Electronics and Telecommunications Engineers

HOBBIES

DIY Electronics
where I design and build small-scale circuits and smart devices using microcontrollers like Arduino and Raspberry Pi—often combining sensors, displays, and solar power for creative problem-solving.

Frontend Development
regularly experimenting with new UI/UX trends, animation libraries, and design systems to build visually appealing and responsive web interfaces beyond professional requirements.

SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), React, Bootstrap
Backend & Build Tools: Node.js, npm, Vite, ESLint
Version Control & Deployment: Git, GitHub, Git LFS, GitHub Pages
Databases: PostgreSQL, MongoDB
Highlights:

- Strong foundation in modern JavaScript (ES6+) and React-based UI development
- Experienced in building fully responsive, mobile-first websites
- Hands-on experience with Git, GitHub, and Git LFS for version control and project management
- Familiar with build tools and code quality practices using Vite and ESLint
- Basic backend and database knowledge with Node.js, PostgreSQL, and MongoDB
- Good understanding of clean UI design, performance optimization, and best frontend practices

PROJECTS

AGRAZ- Freelancer (From 1+ years)

- Working on ERP and CRM modules, focusing on user management, data handling, and workflow optimization.
- implement frontend features and integrations for ERP/CRM systems, ensuring responsive UI, usability, and efficient data flow.

MIVENT - Event Manager

- Built a full-stack event management platform enabling users to manage events, team members, services, quotations, and billing with role-based access.
- Integrated features like secure authentication, and Razorpay payment gateway for annual subscription-based access.

ARICA-E-commerce Site

- Created a responsive web application for ARICA, featuring intuitive UI and seamless cross-device performance.
- Implemented interactive components and streamlined layout to enhance user engagement and navigation.
